Subject: Request for Updated Figure 106-2A, Intrepid Potash – Moab LLC, Cane Creek Potash Mine, M/019/0005, Grand County, Utah

Dear Mr. York:

The Division of Oil, Gas and Mining received the annual report for 2013 for the Cane Creek Potash Mine on February 18, 2014. There were no updated maps or figures with it. The Division's records show that permission was granted by the Utah Division of Water Quality (DWQ) in April of 2013 for two new wells, Extraction Well 43H and 6 Corehole 44C, but the Division has received no further communications regarding these wells, whether they have been drilled or not. If these wells have been drilled or are in the process of being drilled, the Division of Oil Gas and Mining requests an updated Figure 106-2A showing their locations.

The updated Figure 106-2A will be considered an amendment to the Notice of Intention to Commence Large Mining Operations (NOI). Please send 2 full-sized copies of the figure. Once reviewed, one copy will be inserted in the NOI to replace the existing figure, and one will be stamped "approved" and returned to you for your records.

If these wells have not yet been drilled, or are not yet in the process of being drilled, please notify the Division when this will take place and provide a replacement map at that time. Please copy the Division on your notification to the DWQ. Thank you for your cooperation with this matter.

Sincerely,

Paul Baker
Minerals Program Manager
